Response to Arguments

Applicant's arguments filed October 10, 2002 have been fully considered but they are not persuasive.

Applicants argue that the present claims are directed to an improved cathode including EMD of a specified character.

Art Unit: 1741

However, it is clear from reading the claims that the product being claimed is "an improved cathode material and not the cathode itself. Thus applicant arguments are without actual claim basis. Accordingly, the claims are rejected for merely reciting an EMD use.

Further to merely state that the prior art does not disclose one of the properties of the EMD used in the reference does not negate that the prior art uses EMD. The burden is on applicants to show differences between the claimed EMD and the EMD used by the prior art.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
